## TERMS AND NOTICES.

---

**The Prices** quoted are calculated upon a net basis, and our terms are therefore NET, a quarterly account or journey account being allowed. For the benefit of those Customers who prefer to pay monthly a discount of  $2\frac{1}{2}$  per cent. will be allowed, provided that the account is settled by the 15th of the following month. In no circumstances can discount be allowed unless these terms are strictly adhered to.

**Carriage is Paid** on orders amounting in value to £5 and upwards. Packed Goods and all else quoted in our *Prices Current* may be included with Drugs, Chemicals, and Pharmaceutical Preparations, to make up the carriage paid limit, but "dangerous" goods and Distilled Water are excepted.

**The Booking Charges** on small orders sent by carriers are defrayed by us on orders amounting in value to 10/- and upwards.

**Dangerous Goods.**—Articles thus classed, such as Corrosive Acids, Explosive and Inflammable Substances, especially *Ether* and *Benzol*, cannot be consigned as Drugs, and cannot be sent by Sutton and other express Carriers at all. They are carried by railway companies on special days and at special rates.

**Goods supplied in Original Packages** are sold without responsibility or guarantee.

**Goods** delivered in a visibly damaged condition should be signed for accordingly, otherwise signed for as "Not Examined." In all cases goods should be unpacked with the least possible delay and any damage reported at once both to us and to the carrier's local agent.

Attention is called to the Railway Companies' regulation which provides that claims must be lodged within three days of delivery.

**Empties** should be returned as quickly as possible, carriage paid—with name and address of sender enclosed in each package—and an advice note, preferably giving number with full details and values of packages, posted to us in order to facilitate a correct allowance.

Goods or anything of value ought not to be enclosed with empties unless declared, signature taken and carriage paid at the goods rate. Should goods be abstracted in transit from an "empties" package the sender has no redress.

*Absolute ethyl ether for the production of anaesthesia without nausea. This ether is always supplied freshly re-distilled. It is perfectly free from the trace of decomposition products which produce the usual undesirable effects, and has met with unqualified success even in cases of prolonged anaesthesia. Must be kept protected from light and air, and should be used only when fresh.*

Emulsio ferro (B.D.H.) lb. | 1/-

Emulsio magnes. (B.D.H.) lb. | 1/- 2 w. qts. -/1 less.

**Emulsio olei morrhuae 50%**  
cum hypophosph. ... lb. 1/2

This emulsion is our celebrated speciality as formerly made and sold by Barron, Harveys & Co. It contains 50% of the very finest Lofoten cod liver oil with hypophosphites of calcium, sodium and potassium; will keep unchanged in all climates and for a very long time. It is most easily digested, of delightfully delicate flavour, and is inseparable. Packed in various styles ready for Retail, see page 57.

Special quotations for quantities and contracts.

*Ferri oxid.*

Ferric oxide in a more or less hydrated condition in pharmacy, and in varying states of purity in the arts, is used under a great variety of names. The three following preparations (which are warranted pure as regards arsenical contamination, to which iron compounds are liable) are distinguished by descriptive names and cover the pharmaceutical forms of this substance. Impure ferruginous earths and other forms of ferric oxide used in the arts are not included here. [The chief of these are:—Armenian bole ("bole armen."), ochre, sienna, venetian red, colcothar, caput mortuum vitrioli, crocus ferri, crocus martis, polishing crocus and jewellers' rouge.]

Ferri oxid. præcip. fusc. lb. | -/11

A brown powder containing about 85% Fe<sub>2</sub>O<sub>3</sub>, prepared by precipitation from ferric sulphate. Readily soluble in HCl. This is supplied for ferri perox., ferri perox. hydrat. (P.B. '85, etc.), and ferrugo (Edin. Ph. 1841).

Ferri oxid. præcip. rubr. lb. | -/11

A dull red powder containing about 85% Fe<sub>2</sub>O<sub>3</sub>, prepared by precipitation from ferrous sulphate: (it undergoes complete oxidation during the process of washing and drying). Readily soluble in HCl. This is supplied for ferri carb., ferri subcarb., ferri carb. soluble and ferri sesquioxid. solubil.

Ferri oxid. calc. .... lb. | -/6 cwt. 50/-

A bright red powder containing about 99% Fe<sub>2</sub>O<sub>3</sub>, prepared by the calcination of ferrous sulphate. Not readily soluble in HCl. This is supplied for ferri sesquioxid., ferri oxid. rubr. and ferri rubigo.

**A Formulary of CONCENTRATED MIXTURES** suitable for Dispensing  
and compiled from the Pharmacopœias of the London Hospitals, etc.,  
will be sent on application.

## FLEXIBLE GELATINE CAPSULES.

These are soluble, non-adhesive, free from smell and of uniform size and accurate dosage.

They are supplied hand-made (H) and machine-made (M) at same prices.

They should be stored in a cool, equal temperature.

**AMPULLAE, B.D.H.**

These small flasks, containing sterilized solutions for subcutaneous injection, afford many advantages over other forms of hypodermic preparations.

Each hermetically sealed ampulla contains about 1 c.c. of a permanent and stable solution, sufficient for one injection.

The solutions are prepared and sterilized with the greatest possible care, and by their use the risk of small fragments of the medicament remaining undissolved is avoided, and also the risk of any deterioration.

**SPECIAL ATTENTION** is called to the solutions of Cocaine Hydrochloride with Renalin, marked \*. These are particularly suitable for smaller operations, such as tooth extraction, etc. By the addition of Renalin the action of the solution is localized, and a smaller quantity of the salt is required to produce the desired result, thus mitigating largely any risk of poisoning which accompanies the simple solutions of Cocaine and Eucaïne. The addition of the Renalin also greatly checks hæmorrhage.

For use, the end of the flask is broken off and the needle inserted.

Prices—Boxes of 12 ..... 1/6 each. Boxes of 6 ..... 1/- each.  
(These may be assorted if desired.)

A revised and greatly enlarged edition of our Price List of Pills, Capsules, etc., with formulæ, is published separately.

## SOLUBLE COATED AND UNCOATED PILLS.

We supply "sweet" pearl-coated pills, sugar-coated pills, and pearl-coated pills (unsweetened), round or oval, at list prices.

Uncoated pills are supplied at 1d. per gross less than list prices, and may be had rolled in white or coloured powder, or polished natural colour or black.

Gelatine-coated pills, made by a special process without pinholes, are supplied at 1d. per gross more than list prices.

For orders of 10 gross a reduction of 1d. per gross will be made for every 6d. per gross in value.

For orders of 50 gross the reduction is 1½d., and for 100 gross 2d. as above.

Pills are delivered CARRIAGE PAID within the limit of the United Kingdom in free tins.

Pills to PRIVATE FORMULÆ are made and coated in about 10 days.

The following are a few formulæ selected from our SPECIAL LIST. The latter should be consulted whenever possible.

**CACHETS.**

The rates for putting up drugs in cachets (the drugs being charged according to the Price List are :—3/- per gross; 2/1 per 100.

## PHYSIOLOGICALLY STANDARDISED DRUGS.

We supply the following preparations which have been standardised by bio-chemical methods in respect of their physiological action, and they may be relied upon for their unvarying strength. For prices see pages 35 and 36.

|                                  |                                                                                                                             |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Fluid Extract of Ergot.</b>   | Standard adopted—0.2 c.c. raises the main arterial blood pressure 20 m.m. in an animal weighing $1\frac{1}{2}$ kilogrammes. |
| <b>Tincture of Indian Hemp.</b>  | Standard adopted—5 c.c. produces ataxy in an animal weighing 2½ kilogrammes.                                                |
| <b>Tincture of Digitalis.</b>    | Standard adopted—the minimum lethal dose for 100 grammes of frog is 12.5 minims.                                            |
| <b>Tincture of Squills.</b>      | Standard adopted—the minimum lethal dose for 100 grammes of frog is 12.5 minims.                                            |
| <b>Tincture of Strophanthus.</b> | Standard adopted—the minimum lethal dose for 100 grammes of frog is 1.5. minims.                                            |

## GRANULAR EXTRACTS.

Preferred to soft Extracts on the ground of their greater convenience in dispensing.

### STANDARDISED.

|                              |                                                                     |
|------------------------------|---------------------------------------------------------------------|
| <b>Ext. Belladon. Virid.</b> | Standard adopted—1 per cent. of total alkaloid. -/10 oz.            |
| <b>Ext. Hyoscyam. Virid.</b> | Standard adopted—0.2 per cent. of total alkaloid. 1/2 oz.           |
| <b>Ext. Nuc. Vomic.</b>      | Standard adopted—5 per cent. of Strychnine as B.P. Extract. 1/2 oz. |
| <b>Ext. Opii.</b>            | Standard adopted—20 per cent. of Morphine as B.P. Extract. 5/8 oz.  |

### NOT STANDARDISABLE. Strength as B.P. Extract.

## "CINEMA SPRAYS."

Antiseptic Perfume for dilution and spraying in Cinematograph Theatres.

|                 |              |                                                                 |
|-----------------|--------------|-----------------------------------------------------------------|
| Hyacinth ... .. | per lb. 10/- | } In 1 lb. bottles.<br>Directions for use<br>printed on labels. |
| Lilac ... ..    | " 7/6        |                                                                 |
| Lavender ... .. | " 10/-       |                                                                 |

One ounce of the perfume in 1 gallon of water is used in the Spray apparatus.

## VETERINARY MEDICINES.

Our experience as Contractors for the supply of medicines to the Army Veterinary as well as to the Army Medical Departments during a long period, which included the South African War, places us in a favourable position to execute all orders for Veterinary preparations, either in bulk or packed ready for retail, and we shall be pleased to give quotations for making up private formulæ.

The drugs used exclusively are of the best quality, home ground and guaranteed genuine.

A Veterinary Price List is published separately, in which is included recognised formulæ for cattle drenches, dog pills and tablets, horse balls, powders and hypodermic tablets, instruments and sundries, together with a descriptive account of a number of special preparations much used in Veterinary practice.

## TEST SOLUTIONS, INDICATORS, Etc.

## CRESEPTOL.

**Synonyms: Cresol Antiseptic B.D.H., Lysol.**

**A saponaceous germicide of our own manufacture, containing 50 % of cresol.**

Exerts a more powerful bactericidal action than carbolic acid, than which it is less poisonous.

Creseptol is readily miscible with water in all proportions, and being non-corrosive and non-staining, is excellent for cleansing and disinfecting surgical instruments and sick-room utensils, for the washing of hands before operation, for the treatment of wounds and for use as a douche.

## REGISTER.

*Register is kept of Businesses for disposal and of Businesses wanted; also of Situations open and of Assistants requiring Situations.*

A revised and greatly enlarged edition of our Illustrated Price List of Chemists' Specialities is published separately. The numbers quoted below do not indicate differences in quality, but refer to the above-mentioned list, which should be consulted whenever possible.

## CHEMISTS' SPECIALITIES.

Packed ready for Retail.

The name and address of the retailer can in most cases be printed on the labels. For this purpose it is requested that the Chemists' own printed label be sent, in order to avoid possible error.

For orders of less than three dozen a charge of one shilling is made for setting up the type. For quantities of three dozen and upwards no charge is made. This quantity may be taken assorted provided the same type serve for the whole three dozen.

Quotations given for making and packing proprietaries to customers' private formulæ.  
The strictest privacy guaranteed.

\*Physiologically tested (see p. 54).

## AQUEOUS TINCTURES.

The menstruum used is modified in each case to meet the requirement of extraction of the active principles of the drug or drugs operated upon. The proportion of drug to menstruum corresponds to that of the official tincture.

## CHEMICALS.

We are actual manufacturers of most Pharmaceutical Chemicals, and have made a speciality of the manufacture and analysis of these, but either as manufacturers or as distributors, we guarantee all our official chemicals—as the result of our own analysis—to be “**Pure for Pharmaceutical Purposes.**” This comprehensive warranty is printed on every label. For particulars of official chemicals, guaranteed to conform to the stringent “P.P.P.” specifications, and distinguished in this Price List as 

|        |
|--------|
| B.D.H. |
| R.R.R. |

, see special Pamphlet.

Chemicals specified as other than our own, or supplied in original packages, are sold by us without responsibility or guarantee.

## DRUGS.

Our powdered drugs are ground in our own mills and are guaranteed to be absolutely genuine. We do not import drugs in powder form.

## GALENICAL PREPARATIONS.

We manufacture these from genuine drugs of good quality, under supervision of an efficient staff of qualified chemists, and by the most modern and scientific processes, evaporation being carried out for the most part “in vacuo.” Standardisation of preparations by official methods is effected by skilled analysts, who are qualified pharmaceutical chemists. In the case of preparations for the chemical standardisation of which our knowledge is as yet insufficient, reliance for uniformity is placed on careful selection of materials and skilful manipulation in manufacture.

The testing of the preparations of certain drugs is carried out physiologically.

## OILS.

We express or distil these ourselves, or import them direct from well-tried and unimpeachable sources.

Having specialised in the analysis of fixed and essential oils, we are able to guarantee our oils to be genuine and to conform to the most recent standards.

THE BRITISH DRUG HOUSES, LTD.

# HEROGEN

## FOOD FOR THE BRAIN, MUSCLES, TISSUES, NERVES.

From information received, the Proprietors are convinced of the impellent necessity of reiterating with double emphasis the statement that

### HEROGEN

is not an addition to the type of Food represented in the main by a combination of Casein and Glycerophosphates. With such Foods it should not be confounded; from such it *stands apart*.

### HEROGEN

is a Flesh-former, Body-builder, and Heat-generator—a complete, well-balanced, and concentrated Food.

### HEROGEN

is quite distinct from any other Food on the market.

| Size.     | Minimum Wholesale Price. | Retail Price. | Minimum Retail Price. |
